SUBJECT INDEX, VOLUME 3

Acid denaturation, of deoxyribonucleic acids, kinetics and equilibria in, 213
Aggregation, of *S*-carboxymethyl bovine serum albumin, effect of solvent systems on, 595
of oxidized amylose in aqueous solutions, 497
Albumin, *S*-carboxymethyl bovine serum, effect of solvent systems on the aggregation and conformation of, 595
human serum, effect of temperature on the spin-lattice relaxation times of aqueous solutions of, 585
Alkali metals, stabilizing effectiveness toward ribonucleic acid from the bacterial virus R17, 5
Aminoacridines, effect of ionic strength, denaturation, and structure on the interaction with DNA, 135
1-Aminocycloalkanecarboxylic acids, polymerization of *N*-carboxyanhydrides of, 15
Amylose, estimation of cohesive energy densities of some derivatives of, 69
periodate-oxidized, physical properties of, 497
Atomic models, precision space-filling, 665
Bacterial DNA, effect of temperature on the buoyant density in CsCl solutions in the ultracentrifuge, 109
Bacterial virus R17, stabilizing effectiveness of alkali metals toward ribonucleic acid from, 5
Band-forming centerpieces, for the analytical ultracentrifuge, 481
γ-Benzyl-L-glutamate, molecular weight distribution of polymers of, 535
Binding, of magnesium to poly(L-aspartic acid), 249
of water to polypeptides, 275, 593
Bonding, hydrogen, of solutes in water, 275, 593
hydrophobic, in random coil, 335, 593
combinatorial formulation for, 283, 593
Bonds, hydrogen, between helices, side-chain model for, 357
hydrophobic, in random coil, matrix treatment of, 315, 593
interhelical hydrophobic, in short chains, 305, 593
in polyamino acids, statistical mechanics of noncovalent, 275, 283, 305, 315, 335, 357, 369, 379, 401, 593
Bovine serum albumin, *S*-carboxymethyl, effect of solvent systems on the aggregation and conformation of, 595
Buoyant density, of bacterial and viral DNA in CsCl solutions in the ultracentrifuge, temperature effect on, 109
N-Carboxyanhydrides, of 1-aminocycloalkanecarboxylic acids, polymerization of, 15
Carboxymethyl amylose, conformation in aqueous solutions, 185
S-Carboxymethyl bovine serum albumin, effect of solvent systems on the aggregation and conformation of, 595
Centerpieces, band-forming, for the analytical ultracentrifuge, 481
Chain, of arbitrary length, matrix treatment of the helix–coil transition in, 315, 593
including hydrophobic bonding in random coil, combinatorial formulation for, 283, 593
long, treatment by sequence-generating functions, 335, 593
polypeptide, computer determination of the sterically allowed conformations of, 155
determination of the possible conformations of the residues linked in, 591
short, interhelical hydrophobic bonds in, 305, 593
Cohesive energy densities, of some amylose derivatives, estimation of, 69
Coil, random, combinatorial formulation for hydrophobic bonding in, 283, 595
hydrophobic bonding in, 335, 593
matrix treatment of hydrophobic bonds in, 315, 593
Collagen, macromolecules, UV induced change in, 115
tendons, elasticity of, 439
thermodynamic parameters of dilution for, 421
Combinatorial formulation, for short chains including hydrophobic bonding in random coil, 283, 593
Complex, mucopolysaccharide–dye, optical rotatory dispersion of, 617
three-stranded poly(A + 2U), heat of the reaction forming the, 491
Computer determination, of sterically allowed conformations of a polypeptide chain, 155
Conalbumin, 509
Concentration, of salt, effect on shrinkage temperature, 461
Conformation, of carboxymethyl amylose in aqueous solutions, 185
of *S*-carboxymethyl bovine serum albumin, effect of solvent systems on, 595
fluorescence as an indication of, 369
of polymer molecules in solution, x-ray diffraction studies of, 573
of polyriboadenylic acid, pH and temperature dependence of, 121

of the residues linked in a polypeptide chain, determination of possible, 591
sterically allowed in a polypeptide chain, computer determination of, 155
Conformational changes, in the nonionizable water-soluble synthetic polypeptide poly-N^5-(3-hydroxypropyl)-L-glutamine, 625
Cotton effects, magnitude for poly-L-glutamic acid, 209
Counterion radius, influence on the polyelectrolyte behavior of synthetic polypeptide solutions, 545
Covalent loops, in proteins, 379
Crosslinked polymers, intramolecular, evaluation of the internal structure by polarization of fluorescence measurements, 43
Crosslinked synthetic polypeptides, 27, 43
CsCl solutions, in the ultracentrifuge, effect of temperature on the buoyant density of bacterial and viral DNA in, 109
Degradation, of polyribonucleotides, by lanthanum ions, 79
of polyribonucleotides, by zinc and other divalent metal ions, 95
Denaturation, of deoxyribonucleic acids, kinetics and equilibria in, 213
effect on the interaction of aminoacridines with DNA, 135
polypeptide, kinetics of, 657
protein, two-state theory of, 401
Density, buoyant, of bacterial and viral DNA in CsCl solutions in the ultracentrifuge, temperature effect on, 109
Density gradient, three-component theory for the approach to sedimentation equilibrium in, 1
Deoxyribonucleate, native sodium, determination of factors which influence the net hydration of, 57
Deoxyribonucleic acids, kinetics and equilibria in the acid denaturation of, 213
Diffraction, x-ray, studies of the conformation of polymer molecules in solution, 573
Dilution, thermodynamic parameters of, for gelatin and collagen, 421
Dispersion, optical rotatory, of egg proteins, 509
of mucopolysaccharides and mucopolysaccharide–dye complexes, 617
of poly-L-tyrosine in solution, 519
Distribution, of molecular weight, of polymers of γ-benzyl-L-glutamate, 535
DNA, bacterial and viral, effect of temperature on the buoyant density in CsCl solutions in the ultracentrifuge, 109
effect of ionic strength, denaturation, and structure on the interaction with aminoacridines, 135
heterogeneity of the fixation sites of proflavin on, 567
Dye–mucopolysaccharide complexes, optical rotatory dispersion of, 617
Egg proteins, optical rotatory dispersion of, 509
Elasticity, of collagen tendons, 439
Electrostatic interaction, possible relation to the mechanism of translation of the genetic code, 261
Energy densities, cohesive, of some amylose derivatives, estimation of, 69
Equilibria, and kinetics in the acid denaturation of deoxyribonucleic acids, 213
Equilibrium, sedimentation, in a density gradient, three-component theory for the approach to, 1
Fixation sites, of proflavin on DNA, heterogeneity of, 567
Fluorescence, as an indication of conformation, 369
lifetime, of proflavin, 567
measurements, polarization of, evaluation of the internal structure of intramolecularly crosslinked polymers by, 43
Formulation, combinatorial, for short chains including hydrophobic bonding in random coil, 283, 593
Gelatin, thermodynamic parameters of dilution for, 421
Genetic code, electrostatic interaction and its possible relation to the mechanism of translation of, 261
Heat of reaction, of formation of the three-stranded poly(A + 2U) complex, 491
Helical segments, interactions between, 335, 593
Helices, model for side-chain hydrogen bonds between, 357
Helix–coil transition, for chains of arbitrary length, matrix treatment of, 315, 593
in poly-ε-carbobenzoxy-L-lysine, 241
Heterogeneity, of the fixation sites of proflavin on DNA, 567
Human serum albumin, effect of temperature on the spin-lattice relaxation times of aqueous solutions of, 585
Hydration, net, of native sodium deoxyribonucleate, determination of factors which influence, 57
Hydrogen bond, between helices, side-chain model for, 357
Hydrogen bonding, of solutes in water, 275, 593
Hydrogen–tritium exchange, of poly-L-glutamic acid in aqueous solutions, 555
Hydrophobic bonds, interhelical, in short chains, 305, 593
in random coil, 335, 593
matrix treatment of, 315, 593
combinatorial formulation for, 283, 593
Interactions, between helical segments, 335, 593
between proteins and salt solutions, 421 439, 461
between trinucleotides, 261

Interhelical hydrophobic bonds, in short chains, 305, 593
Ionic strength, effect on the interaction of aminoacridines with DNA, 135
Ions, metal, degradation of polyribonucleotides by, 79, 95
Kinetics, and equilibria in the acid denaturation of deoxyribonucleic acids, 213
of polypeptide denaturation, 657
Lanthanum ions, degradation of polyribonucleotides by, 79
Lifetime, of proflavin fluorescence, 567
Loops, covalent, in proteins, 379
Lysozyme, 509
Magnesium, binding to poly(L-aspartic acid), 249
Matrix treatment, of helix–coil transition for chains of arbitrary length, 315, 593
of hydrophobic bonds in random coil, 315, 593
Mechanism, of translation of the genetic code, possible relation of electrostatic interaction to, 261
Melting temperature, of DNA, dependence on salt concentration, 195
Metal ions, degradation of polyribonucleotides by, 79, 95
Metals, alkali, stabilizing effectiveness toward ribonucleic acid from the bacterial virus R17, 5
Models, atomic, precision space-filling, 665
for side-chain hydrogen bonds between helices, 357
Molecular weight distribution, of polymers of γ-benzyl-L-glutamate, 535
Mucopolysaccharide, optical rotatory dispersion of, 617
Mucopolysaccharide–dye complexes, optical rotatory dispersion of, 617
NMR, study of the secondary structure of s-RNA, 609
Noncovalent bonds, in polyamino acids, statistical mechanics of, 275, 283, 305, 315, 335, 357, 369, 379, 401, 593
Optical rotatory dispersion, of egg proteins, 509
of mucopolysaccharides and mucopolysaccharide–dye complexes, 617
of poly-L-tyrosine in solution, 519
Ovalbumin, 509
Ovomucoid, 509
Oxidized amylose, aggregation in aqueous solutions, 497
Parameters, thermodynamic, of dilution for gelatin and collagen, 421
Periodate-oxidized amylose, physical properties of, 497
pH, dependence of the conformation of polyriboadenylic acid on, 121
Polarization, of fluorescence measurements, evaluation of the internal structure of intramolecularly crosslinked polymers by, 43
Polyamino acids, statistical mechanics of noncovalent bonds in, 275, 283, 305, 315, 335, 357, 369, 379, 401, 593
Poly(L-aspartic acid), magnesium binding to, 249
Poly(A + 2U) complex, three-stranded, heat of the reaction forming the, 491
Poly-ε-carbobenzoxy-L-lysine, helix–coil transition in, 241
Poly-3,5-dibromotyrosine, 573
Polyelectrolyte behavior, of synthetic polypeptide solutions, influence of counterion radius on, 545
Poly $Glu^{51}Lys^{33}Tyr^{16}$, preparation and characterization of, 27
Poly $Glu^{52}Lys^{15}Tyr^{15}$ No. 3, preparation and characterization of, 27
Polyglutamic acid, a new transition in, 681
Poly-L-glutamic acid, magnitude of Cotton effects for, 209
tritium–hydrogen exchange in aqueous solutions of, 555
Poly-N^5-(3-hydroxypropyl)-L-glutamine, conformational changes in the nonionizable water-soluble synthetic polypeptide, 625
Polymerization, of *N*-carboxyanhydrides of 1-aminocycloalkanecarboxylic acids, 15
Polypeptide, binding of water to, 275, 593
chain, computer determination of the sterically allowed conformations of, 155
determination of the possible conformations of the residues linked in, 591
crosslinked synthetic, 27, 43
denaturation, kinetics of, 657
solutions, synthetic, influence of counterion radius on the polyelectrolyte behavior of, 545
synthetic, conformational changes in the nonionizable water-soluble poly-N^5-(3-hydroxypropyl)-L-glutamine, 625
Polyriboadenylic acid, conformation dependence on pH and temperature, 121
Polyribonucleotides, degradation, by lanthanum ions, 79
by zinc and other divalent metals, 95
Proflavin, quantum yield, fluorescence lifetime, and heterogeneity of the fixation sites on DNA of, 567
Properties, physical, of periodate-oxidized amylose, 497
Protein, denaturation, two-state theory of, 401
egg, optical rotatory dispersion of, 509
interaction with salt solutions, 421, 439, 461
Quantum yield, of proflavin, 567
Radius, counterion, influence on the polyelectrolyte behavior of synthetic polypeptide solutions, 545
Random coil, hydrophobic bonding in, 335, 593
combinatorial formulation for, 283, 593
matrix treatment of hydrophobic bonds in, 315, 593
Reaction, heat of, of formation of the three-stranded poly(A + 2U) complex, 491

Relaxation times, spin-lattice, of aqueous solutions of ribonuclease and human serum albumin, effect of temperature on, 585
Residues, linked in a polypeptide chain, determination of the possible conformations of, 591
Ribonuclease, effect of temperature on the spin-lattice relaxation times of aqueous solutions of, 585
Ribonucleic acid, from bacterial virus R17, stabilizing effectiveness of alkali metals toward, 5
s-RNA, NMR study of the secondary structure of, 609
Salt, concentration, dependence of the melting temperature of DNA on, 195
  effect of type and concentration on shrinkage temperature, 461
  solutions, interaction between proteins and, 421, 439, 461
Secondary structure, of s-RNA, NMR study of, 609
Sedimentation equilibrium, in a density gradient, three-component theory for the approach to, 1
Segments, helical, interactions between, 335, 593
Sequence-generating functions, treatment of long chains by, 335, 593
Serum albumin, *S*-carboxymethyl bovine, effect of solvent systems on the aggregation and conformation of, 595
  human, effect of temperature on the spin-lattice relaxation times of aqueous solutions of, 585
Shrinkage temperature, effect of salt type and concentration on, 461
Sodium deoxyribonucleate, native, determination of factors which influence the net hydration of, 57
Solutes, hydrogen bonding in water, 275, 593
Solutions, aqueous, aggregation of oxidized amylose in, 497
    of poly-L-glutamic acid, trituim–hydrogen exchange in, 555
  of ribonuclease and human serum albumin, effect of temperature and spin-lattice relaxation times on, 585
  salt, interaction between proteins and, 421, 439, 461
  of synthetic polypeptides, influence of counterion radius on the polyelectrolyte behavior of, 545
  x-ray diffraction studies of the conformation of polymer molecules in, 573
Solvent systems, effect on the aggregation and conformation of *S*-carboxymethyl bovine serum albumin, 595
Spin-lattice relaxation times, of aqueous solutions of ribonuclease and human serum albumin, effect of temperature on, 585
Stabilizing effectiveness, of alkali metals toward ribonucleic acid from the bacterial virus R17, 5
Statistical mechanics, of noncovalent bonds in polyamino acids, 275, 283, 305, 315, 335, 357, 369, 379, 401, 593
Structure, effect on the interaction of aminoacridines with DNA, 135
  internal, of intramolecularly crosslinked polymers by polarization of fluorescence measurements, 43
  secondary, of s-RNA, NMR study of, 609
Synthetic polypeptide, conformational changes in the nonionizable water-soluble poly-N^5-(3-hydroxypropyl)-L-glutamine, 625
Temperature, dependence of the conformation of polyriboadenylic acid on, 121
  effect on the buoyant density of bacterial and viral DNA in CsCl solutions in the ultracentrifuge, 109
  effect on the spin-lattice relaxation times of aqueous solutions of ribonuclease and human serum albumin, 585
  of melting for DNA, dependence on salt concentration, 195
  of shrinkage, effect of salt type and concentration on, 461
Tendons, collagen, elasticity of, 439
Thermodynamic parameters, of dilution for gelatin and collagen, 421
Time, spin-lattice relaxation, of aqueous solutions of ribonuclease and human serum albumin, effect of temperature on, 585
Transition, helix–coil, for chains of arbitrary length, matrix treatment of, 315, 593
    in poly-ε-carbobenzoxy-L-lysine, 241
  new, in polyglutamic acid, 681
Trinucleotides, interactions between, 261
Tritium–hydrogen exchange, of poly-L-glutamic acid in aqueous solutions, 555
Two-state theory, of protein denaturation, 401
Ultracentrifuge, analytical, band-forming centerpieces for, 481
  effect of temperature on the buoyant density of bacterial and viral DNA in CsCl solutions in, 109
UV, change in collagen macromolecules, 115
Viral DNA, effect of temperature on the buoyant density in CsCl solutions in the ultracentrifuge, 109
Virus R17, bacterial, stabilizing effectiveness of alkali metals toward ribonucleic acid from, 5
Water, binding of, to polypeptides, 275, 593
  hydrogen bonding of solutes in, 275, 593
X-ray diffraction studies, of the conformation of polymer molecules in solution, 573
Zinc ions, degradation of polyribonucleotides by, 95

Statement of ownership, management, and circulation (Act of October 23, 1962: Section 4369, Title 39, United States Code)

1. Date of filing: September 24, 1965

2. Title of Publication: Biopolymers

3. Frequency of issue: Bimonthly

4. Location of known office of publication: 20th and Northampton Streets, Easton, Pennsylvania 18043

5. Location of headquarters of general business offices of publisher: 605 Third Avenue, New York, New York 10016

6. The names and addresses of publisher, editor, and managing editor:
Publisher: Eric S. Proskauer, John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
Editor: None
Managing Editor Murray Goodman, Polytechnic Institute of Brooklyn, 333 Jay Street, Brooklyn 1, New York

7. Owner: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
Stockholders owning or holding 1 per cent or more of total amount of John Wiley & Sons, Inc., stock as of September 30, 1965:
Cynthia W. Darby, 23 Farrington St., Newburgh, N. Y.; Maurits Dekker, 511 West 232nd St., Bronx, N. Y.; Rozetta S. Dekker, 511 West 232nd St., Bronx, N. Y.; Julia W. Gilbert, Box 1191, Carmel, California; Edward P. Hamilton, % John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; W. Bradford Wiley and Francis Lobdell, Trustees of Elizabeth W. Hamilton Trust, dated 12/23/52, % John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minn.; Willy Levinger, 336 Central Park West, New York, N. Y.; R. R. Pennywitt, Box 211, Mantaloking, N. J.; C. R. Runyon, Jr., 130 East End Ave., New York 28, N. Y.; Francis Lobdell and William J. Seawright, Trustees f/b/o Deborah Elizabeth Wiley, u/a dated 6/2/58, % John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; Francis Lobdell and William J. Seawright, Trustees f/b/o Peter Booth Wiley, u/a dated 6/2/58, % John Wiley & Sons, Inc., New York 16, N. Y.; Francis Lobdell and William J. Seawright, Trustees f/b/o William Bradford Wiley, 2nd, u/a dated 6/2/58, % John Wiley & Sons, Inc., 605 Third Avenue, New York, 16, N. Y., Adele E. Windheim, 8 Dundee Rd., Larchmont, N. Y.; W. Bradford Wiley and E. P. Hamilton; Trustees for Edward P. Hamilton Foundation, u/a dated 12/23/57, % John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; Reing & Co., P. O. Box 491, Church St. Station, New York 8, N. Y.; Eric S. Proskauer and Charles H. Lieb, as Trustees u/a dated 11/27/62, 220 Central Park South, New York 19, N. Y.; Edward P. Hamilton as Executor of the Will of Elizabeth Wiley Hamilton, dec'd.; Cynthia Darby and Julia Wiley Gilbert as Executors of the Will of Kate R. Q. Wiley; Edward Hamilton and Cynthia Wiley Darby as Trustees under Will of William Q. Wiley

8. Known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None

9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 per cent or more of the total amount of the stock or securities of the publishing corporation.

10. This item must be complete for all publications except those which do not carry advertising other than the publishers own and which are named in Sections 132.231, 132.232, and 132.233, Postal Manual (Sections 4355a, 4355b, and 4356 of Title 39, United States Code)
I certify that the statements made by me above are correct and complete.

Eric S. Proskauer
Publisher

CONTENTS

Vol. 3, Issue Nos. 1–6

Biopolymers

ISSUE NO. 1, FEBRUARY

JOHN E. HEARST. Three-Component Theory for the Approach to Sedimentation Equilibrium in a Density Gradient 1
JULIUS A. GORDON: Stabilizing Effectiveness of Alkali Metals toward Ribonucleic Acid from the Bacterial Virus R17 5
MAX FRANKEL and MARIO DAVID BACHI: Polymerization of *N*-Carboxyanhydrides of 1-Aminocycloalkanecarboxylic Acids 15
PETER S. MARFEY, THOMAS J. GILL III, and HEINZ W. KUNZ: Crosslinked Synthetic Polypeptides. I. Preparation and Characterization of Crosslinked Poly $Glu^{51}Lys^{33}Tyr^{16}$ and of Poly $Glu^{52}Lys^{15}Tyr^{15}$ No. 3 27
THOMAS J. GILL III: Crosslinked Synthetic Polypeptides. II. Evaluation of the Internal Structure of Intramolecularly Crosslinked Polymers by Polarization of Fluorescence Measurements ... 43
JOHN E. HEARST. Determination of the Dominant Factors Which Influence the Net Hydration of Native Sodium Deoxyribonucleate 57
J. M. G. COWIE: Studies on Amylose and its Derivatives. Part IV. Estimation of Cohesive Energy Densities of Some Amylose Derivatives 69
GUNTHER L. EICHHORN and JAMES J. BUTZOW: Interactions of Metal Ions with Polynucleotides and Related Compounds. III. Degradation of Polyribonucleotides by Lanthanum Ions 79
JAMES J. BUTZOW and GUNTHER L. EICHHORN: Interactions of Metal Ions with Polynucleotides and Related Compounds. IV. Degradation of Polyribonucleotides by Zinc and Other Divalent Metal Ions 95

ISSUE NO. 2, APRIL

JEROME VINOGRAD, ROBERT GREENWALD, and JOHN E. HEARST: Effect of Temperature on the Buoyant Density of Bacterial and Viral DNA in CsCl Solutions in the Ultracentrifuge 109
EIJI FUJIMORI: Ultraviolet Light-Induced Change in Collagen Macromolecules 115
D. N. HOLCOMB and I. TIŇOCO, JR.: Conformation of Polyribo-

adenylic Acid: pH and Temperature Dependence 121
D. S. Drummond, V. F. W. Simpson-Gildemeister, and A. R. Peacocke: Interaction of Aminoacridines with Deoxyribonucleic Acid: Effects of Ionic Strength, Denaturation, and Structure 135
George Némethy and Harold A. Scheraga: Theoretical Determination of Sterically Allowed Conformations of a Polypeptide Chain by a Computer Method 155
V. S. R. Rao and Joseph F. Foster: Studies of the Conformation of Carboxymethyl Amylose in Aqueous Solutions 185
Carl Schildkraut and Shneior Lifson: Dependence of the Melting Temperature of DNA on Salt Concentration 195

Communication to the Editors

Jen Tsi Yang and William J. McCabe: On the Magnitude of the Cotton Effects of Poly-L-glutamic Acid 209

Issue No. 3, June

L. G. Bunville, E. P. Geiduschek, M. A. Rawitscher, and J. M. Sturtevant: Kinetics and Equilibria in the Acid Denaturation of Deoxyribonucleic Acids from Various Sources 213
F. E. Karasz, J. M. O'Reilly, and H. E. Bair: Helix-Coil Transition in Poly-ε-carbobenzoxy-L-lysine 241
A. L. Jacobson: Magnesium Binding to Poly(L-aspartic Acid) 249
H. A. Nash and D. F. Bradley: Interactions Between Trinucleotides: The Electrostatic Contribution and Its Possible Relation to the Mechanism of Translation of the Genetic Code 261
Douglas C. Poland and Harold A. Scheraga: Statistical Mechanics of Noncovalent Bonds in Polyamino Acids. I. Hydrogen Bonding of Solutes in Water, and the Binding of Water to Polypeptides 275
Douglas C. Poland and Harold A. Scheraga: Statistical Mechanics of Noncovalent Bonds in Polyamino Acids. II. Combinatorial Formulation for Short Chains, Including Hydrophobic Bonding in Random Coil 283
Douglas C. Poland and Harold A. Scheraga: Statistical Mechanics of Noncovalent Bonds in Polyamino Acids. III. Interhelical Hydrophobic Bonds in Short Chains 305
Douglas C. Poland and Harold A. Scheraga: Statistical Mechanics of Noncovalent Bonds in Polyamino Acids. IV. Matrix Treatment of Hydrophobic Bonds in the Random Coil and of the Helix–Coil Transition for Chains of Arbitrary Length 315
Douglas C. Poland and Harold A. Scheraga: Statistical Mechanics of Noncovalent Bonds in Polyamino Acids. V. Treatment of Long Chains by the Method of Sequence-Generating Func-

tions: Hydrophobic Bonding in Random Coil, and Interactions Between Helical Segments 335

Issue No. 4, August

Douglas C. Poland and Harold A. Scheraga: Statistical Mechanics of Noncovalent Bonds in Polyamino Acids. VI. A Simple Model for Side-Chain Hydrogen Bonds Between Helices 357
Douglas C. Poland and Harold A. Scheraga: Statistical Mechanics of Noncovalent Bonds in Polyamino Acids. VII. Fluorescence as an Indication of Conformation 369
Douglas C. Poland and Harold A. Scheraga: Statistical Mechanics of Noncovalent Bonds in Polyamino Acids. VIII. Covalent Loops in Proteins 379
Douglas C. Poland and Harold A. Scheraga: Statistical Mechanics of Noncovalent Bonds in Polyamino Acids. IX. The Two-State Theory of Protein Denaturation 401
L. V. Rajagh, D. Puett, and A. Ciferri: Interaction Between Proteins and Salt Solutions. I. Thermodynamic Parameters of Dilution for Gelatin and Collagen 421
D. Puett, A. Cferri, and L. V. Rajagh: Interaction Between Proteins and Salt Solutions. II. Elasticity of Collagen Tendons 439
A. Ciferri, L. V. Rajagh, and D. Puett: Interaction Between Proteins and Salt Solutions. III. Effect of Salt Type and Concentration on the Shrinkage Temperature 461
Jerome Vinograd, Roger Radloff, and Robert Bruner: Band-Forming Centerpieces for the Analytical Ultracentrifuge 481
Philip D. Ross and Robert L. Scruggs: Heat of the Reaction Forming the Three-Stranded Poly (A + 2U) Complex 491
Stig R. Erlander, H. L. Griffin, and F. R. Senti: Physical Properties of Periodate-Oxidized Amylose: Aggregation of Oxidized Amylose in Aqueous Solutions 497

Issue No. 5, October

Yoshio Tomimatsu and William Gaffield: Optical Rotatory Dispersion of Egg Proteins. I. Ovalbumin, Conalbumin, Ovomucoid, and Lysozyme 509
Yoh-Han Pao, Ruskin Longworth, and R. L. Kornegay: Optical Rotatory Dispersion of Poly-L-tyrosine in Solution 519
Ernesto Scoffone, Evaristo Peggion, Alessandro Cosani, and Maria Terbojevich: Molecular Weight Distribution of Polymers of γ-Benzyl-L-glutamate 535
C. Botré, M. Solinas, and F. Ascoli: Influence of Counterion Radius on the Polyelectrolyte Behavior of Synthetic Polypeptide Solutions 545

AKIRA IKEGAMI, SADAAKI YAMAMOTO, and FUMIO OOSAWA: Tritium–Hydrogen Exchange of Poly-L-glutamic Acid in Aqueous Solutions. 555

G. WEILL: Rendement Quantique, Temps de Vie de Fluorescence and Heterogeneité des Sites de Fixation de la Proflavine sur le DNA. 567

GEORGE W. BRADY, R. SALOVEY, and J. M. REDDY: X-Ray Diffraction Studies of the Conformation of Polymer Molecules in Solution. II. Poly-3,5-dibromotyrosine. 573

D. J. BLEARS and S. S. DANYLUK: Effect of Temperature on the Spin-Lattice Relaxation Times of Aqueous Solutions of Ribonuclease and Human Serum Albumin. 585

Communication to the Editors

G. N. RAMACHANDRAN, C. RAMAKRISHNAN, and C. M. VENKATACHALAM: Determination of the Possible Conformations of the Residues Linked in a Polypeptide Chain. 591

Erratum
